Make sure you are **receiving credit to save money!**

- ☀️ **Contact your utility company to take advantage of their solar program** to receive solar credit for the energy you are producing.
- ☀️ You may be able to choose a different electric provider that gives beneficial rates for solar customers.
- ☀️ It will take up to **2-3 billing cycles for your utility bill to reflect solar energy production.**
- ☀️ Questions about your utility bill or how to read it? Please contact your utility provider.

Watch your system produce energy by **checking out the monitoring app!**

- ☀️ There's an app for that! Use the information provided to set up your monitoring account and **check out your energy production.**
- ☀️ Data is delayed and not in real time due to how data is stored and communicated. **Review the data from the previous day** to get an accurate picture of system production.
- ☀️ We recommend you **check the app monthly** to make sure all is working as designed.

Maintenance is easy and you can do it, or we can!

- ☀️ The glass covering on solar panels can become soiled by dust or tree pollen, and you may consider periodic cleaning.
- ☀️ Take safety precautions when cleaning your panels, including:
 - o Turning the system completely off.
 - o Use proper safety equipment if accessing the roof.
 - o Use mild soap and water on the panels (no chemical cleaners).
- ☀️ **Texas Solar is happy to clean the solar panels for you**, for which a service fee is charged.

Should issues arise, pick up the phone and **call us, as we are happy to help!**

- ☀️ **We guarantee our installation workmanship.** Should you discover an issue with our workmanship during the installation process, call our Customer Service Specialist for immediate assistance at **210-245-6600.**
- ☀️ If you find that your system is not working as designed, we can help with that as well. **We can assist with system issues after installation**, for which a service fee is charged.
